

Standard benchtop edge profiles

Bullnose

- Straight edges - Satin, Mirror polished, or textured - i.e. 5WL, Checks, Linen
- Curved edges - Mirror polished

NOTE: we don't use tube or pipe for the bullnose edge as this is not successful

Square edge

- Straight edges are folded from benchtop material, curves are welded on
- Can be textured, Satin, or Mirror polished

NOTE: the texture of the edge can be different to the benchtop texture, but is a bit more expensive

Domestic wet edge

- Mainly (but not exclusively) used in domestic situations
- Can be textured, Satin, or Mirror polished

NOTE: the texture of the edge can be different to the benchtop texture, but is a bit more expensive

Commercial wet edge

- Used in commercial situations
- Usually Satin, can be any of the above

NOTE: the texture of the edge can be different to the benchtop texture, but is a bit more expensive
